

to Whom It May Concern:

Satellite Radio is the best!!! I am especially happy that it now offers traffic and weather channels. Particularly because I quite often travel via automobile to various cities and states. Satellite Radio provides a wide range of channels, not to mention the sound quality that's something that can not be achieved otherwise. Since I'm paying for said service I believe that I as a subscriber should be the one to dictate what I want to hear. It should not be up to the National Association of Broadcasters to dictate what I'm permitted to hear.

I respectfully urge you, the FCC, to reject the NAB's petition 04-160 and support XM's ability to provide the type of programming that I demand and deserve.
